eHealth Global and MedLink International Agree to Strategic Alliance to Further Streamline Access to Patient Records at the Point of Care

ROCHESTER, N.Y., August 23, 2007 — eHealth Global Technologies, Inc., an industry-leading provider of patient medical records management services, and MedLink International, Inc. (OTCBB: MLKNA.OB) (Frankfurt: WM6B), an Ambulatory Electronic Health Record (EHR) and related solutions vendor, have entered into a strategic alliance that will provide clinicians with greater access to a patient's medical record. MedLink will promote eHealth Global's portfolio of services to customers who do business with MedLink, while eHealth Global will promote MedLink's portfolio of solutions to its current and future customers.

eHealth Global's portfolio of services are centered around the collection, digitization and access to Medical Records and Images on behalf of tertiary care facilities and specialty clinics with large referral volumes such as Transplant, Oncology and Cardiology.

"MedLink has an extremely strong portfolio of solutions for ambulatory practices, multi-specialty clinics and community hospitals. We hope to make it even easier for MedLink's clients and their patients to take advantage of this technology, by helping them deal with legacy medical records and link to scattered outside medical records that may be paper, film, or any number of digital formats," stated Ken Rosenfeld, President of eHealth Global. "Now, with the help of eHealth Global, a health care provider will be able to extract even more value out of their MedLink EHR solution."

Ray Vuono, CEO and President of MedLink International, Inc., stated "Our partnership with eHealth Global is a major step by our organizations to affect the portability of health records, as the standardization and portability of medical records becomes more of a priority of

healthcare legislation. Together we are demonstrating how organizations can work together and bring solutions that empower physicians to make better decisions about the health of their patients and enable patients more easily to switch doctors, hospitals or health plans, intensifying the competition to provide good quality care.”

About eHealth Global Technologies

eHealth Global Technologies is an industry-leading medical record service provider. The company combines advanced information technology with its world-class clinical customer support team to collect and manage patient data that resides beyond the ‘digital reach’ of its customers. eHealth Global’s eRetriever™, eHealthConnect™, and eHealthShare™ services help patients, tertiary medical departments, community hospitals, and private healthcare institutions improve productivity, reduce repeat exams, and enhance patient care through better, faster access to patient records. Please visit the web site at: www.ehgt.com for more information.

About MedLink International, Inc.

MedLink International is a publicly held NASDAQ Bulletin Board and Frankfurt Stock Exchange company (OTCBB: MLKNA) (FRANKFURT: WM6B), which supplies its proprietary MedLink EHR software via a Virtual Private Network (VPN) to a network of physicians, radiology clinics and other types of medical offices.

The MedLink VPN allows subscribing doctors to securely communicate with other physicians and remotely access and retrieve patient records, lab results, X-Rays, CAT Scans and other patient health information. Through its VPN, MedLink offers member institutions and physicians other products and services, such as MedLink TV, MedLink Scheduler, MedLink Billing, Secure Health Mail, Remote PACS, Health IT infrastructure and networking, document management, and video conferencing. The MedLink VPN delivers pertinent drug information from pharmaceutical companies to physicians. In addition to the physician Virtual Private Network, MedLink is also providing a consumer network displaying medical education, information and advertising on a network of digital screens installed in the waiting rooms of radiology clinics, medical laboratories, and physician offices. Please visit www.medlinkus.com for more information.
